Art Unit: 2834

Drawings

1. The objection to the drawings under 37 CFR 1.83(a) is withdrawn.

Claim Rejections - 35 USC § 112

2. The rejection of Claims 1, 11-18, and 20-31 under 35 U.S.C. 112, first paragraph, and second paragraphs are withdrawn.

Claim Rejections - 35 USC § 102

- 3. The rejection of Claim 1 over Beppu et al. (Beppu)(US 5008573) is withdrawn.
- 4. The rejection of Claims 1, 11, and 18 over Maughan et al. (Maughan)(US 5,365,388) is withdrawn.
- 5. The rejection of Claims 1, 11 and 18 over Takahashi (JP 05-199,721) is withdrawn.

Claim Objections

6. Claim 20 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claims, or amend the claims to place the claims in proper dependent form. Claim 20 is improper because they fail to further limit the parent claim having which already includes a limitation to the punch out grid.

Art Unit: 2834

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 9. Claims 1, 11 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable by Takahashi (JP 05-199,721) and Schmider (US 5006765). Takahashi teaches every aspect of the invention except the base plate including an extrusion coated punchout grid to dampen torque vibrations. Schmider teaches using an extrusion coated punched out grid to support the stator inside the rotor to provide a cost effective and reliable electrical connection to the motor. It is inherenty that the an extrusion coated punched out grid of Schmider will reduce some of the high frequency torque vibrations of the motor because. It would have been obvious to a person of ordinary skill in the art at the

Art Unit: 2834

time of the invention to construct the motor of Takahashi with the circuit board replaced by an extrusion coated punchout grid to provide a cost effective and reliable electrical connection to the motor.

Allowable Subject Matter

- 10. Claims 24-31 are allowed.
- 11. Claims 12-17 and 21-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

- 12. Applicant's arguments filed November 30, 2004 have been fully considered but they are most in view of the new ground of rejection.
- 13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (571) 272 2036.

The examiner can be normally contacted on Monday through Friday from 8:00 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Darren Schuberg, can be reached at (571) 272 - 2044. The facsimile number for the Group is (703) 872 - 9306.
